<https://business.smu.edu.sg/business/disciplines/finance/Major-Tracks>

Why major in finance?

1. You need to be trained in Financial knowledge/literacy

Eg. How will all the Financial markets be affected by the global events happening around the world?

Why major in finance?

- ❑ With the numerous global events happening every day, how will it affect security analyses?
- ❑ Think about the different types of Asset classes:
eg. Equities, Fixed Income, Derivatives, Real Estate, Currencies.
- ❑ When is it the RIGHT TIME to
 - **BUY**
 - **SELL**
 - **HOLD** Financial securities?

1. You need to be trained in
Financial knowledge/literacy!

3 core

- Sustainability Management and Governance

Choose 2 from:

- Sustainable Finance Instruments
- Sustainability Risk Management
- Sectoral Decarbonisation Knowledge
- Carbon Markets and Products
- Sustainable and Impact Investing

Key things about tracks

- Tracks are optional
 - If you choose a track you take 3 core +5 more
 - If you choose a regular finance major, you take only 3 core +3 more.
- Track Benefits
 - You become more skilled and attractive to the job area within finance you wish to focus on.
 - More internships/partnerships/awards in some tracks.
- Track Misconception
 - A track person is NOT pigeonholing themselves.
 - A finance track person takes more electives: 3+5, not just 3+3; so a track person is actually more well-trained in finance than a regular finance major.

Finance as a second major - Requirements

- For LKCSB students: Same criteria: **3 core + 3 more** electives.
- Same for other schools' students, but in addition:
 - Must also take Finance 101 because it is a typical prerequisite for finance electives.
 - Must also take Financial Accounting because it is a prerequisite for the core elective course Corporate Reporting.

Importance of Finance as a second major - for non-BBM students

- Benefits
 - Being trained in Finance provides you with a wider range of exciting career choices.
 - Regardless of whether you are an Entrepreneur or employed by companies, all types of professions need financial expertise to generate value.
- Examples:
 - You could be helping your employer manage their capital or investing surplus funds
 - You could be a Business IT professional consultant working in a Bank
 - You could be an internal Lawyer working in a major Securities house
 - You could be an Accounting professional working in a fund management company
 - You could be the Auditor for a major Bank
 - You could be an Economist with a major Financial Institution

Importance of Finance as a second major - for non-BBM students

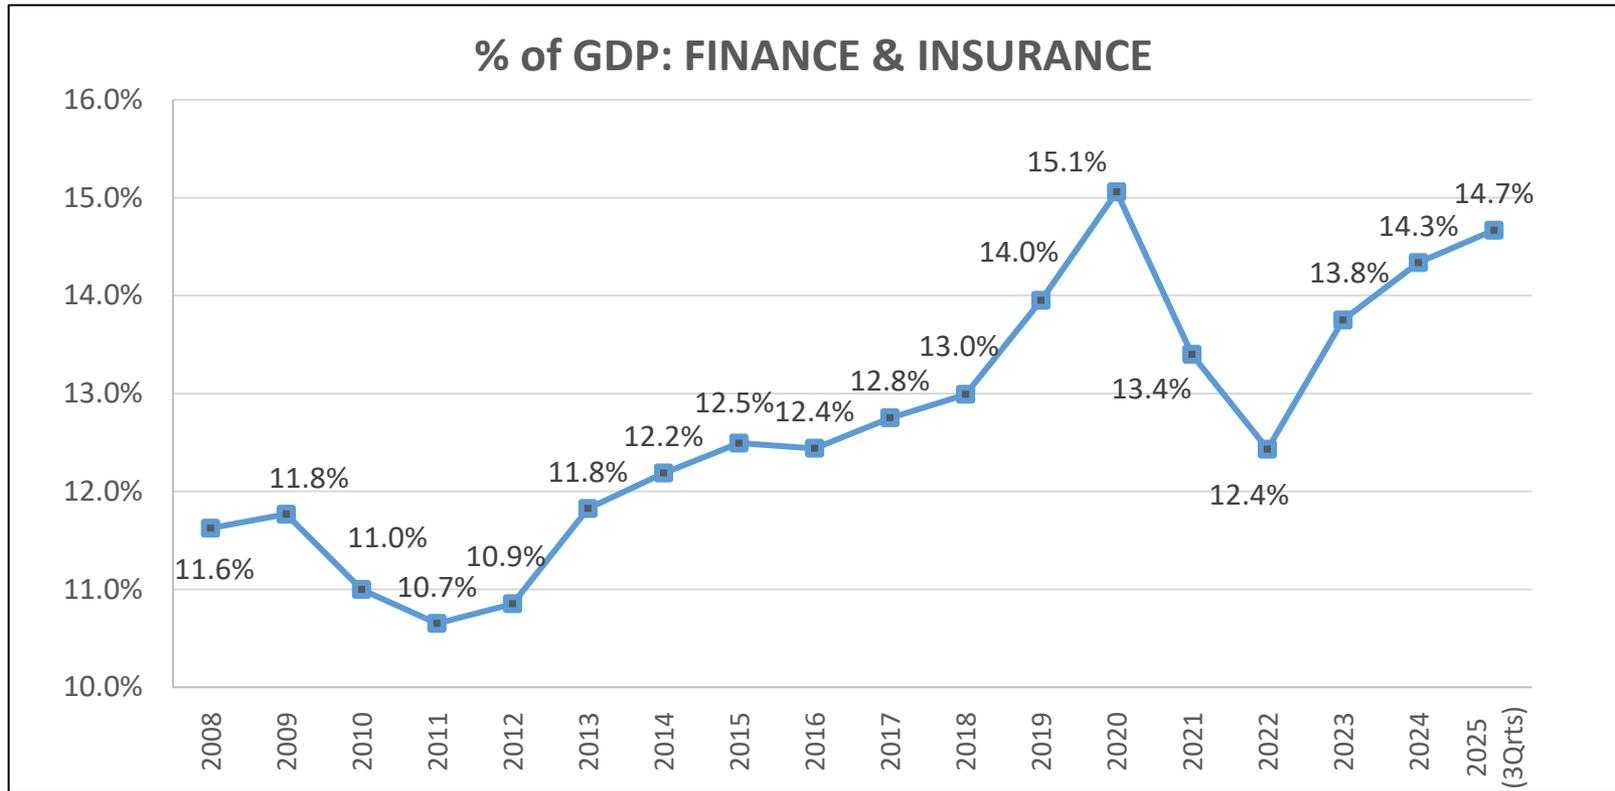

- **More** Benefits

- Finance is more than numbers
- Finance equips you with problem-solving analytical skills and strategies
- Finance teaches you to appreciate how global markets are structured
 - To venture beyond domestic fields and apply to wider domains
- You will be able to apply these skills in your own professions.
- Given the ever-volatile markets, there is increasing need for competent professionals with finance skills in all organizations:
 - Small-to-medium enterprises (SMEs)
 - Large Multinational corporations (MNCs)
 - Government organizations
 - Non-profit organizations
- Your professional expertise, coupled with quantitative and qualitative finance knowledge will provide you with plenty of attractive career opportunities.

Why major in finance?

1. You need to be trained in financial knowledge/literacy
2. **Jobs, jobs, jobs**

Key sector in SG economy

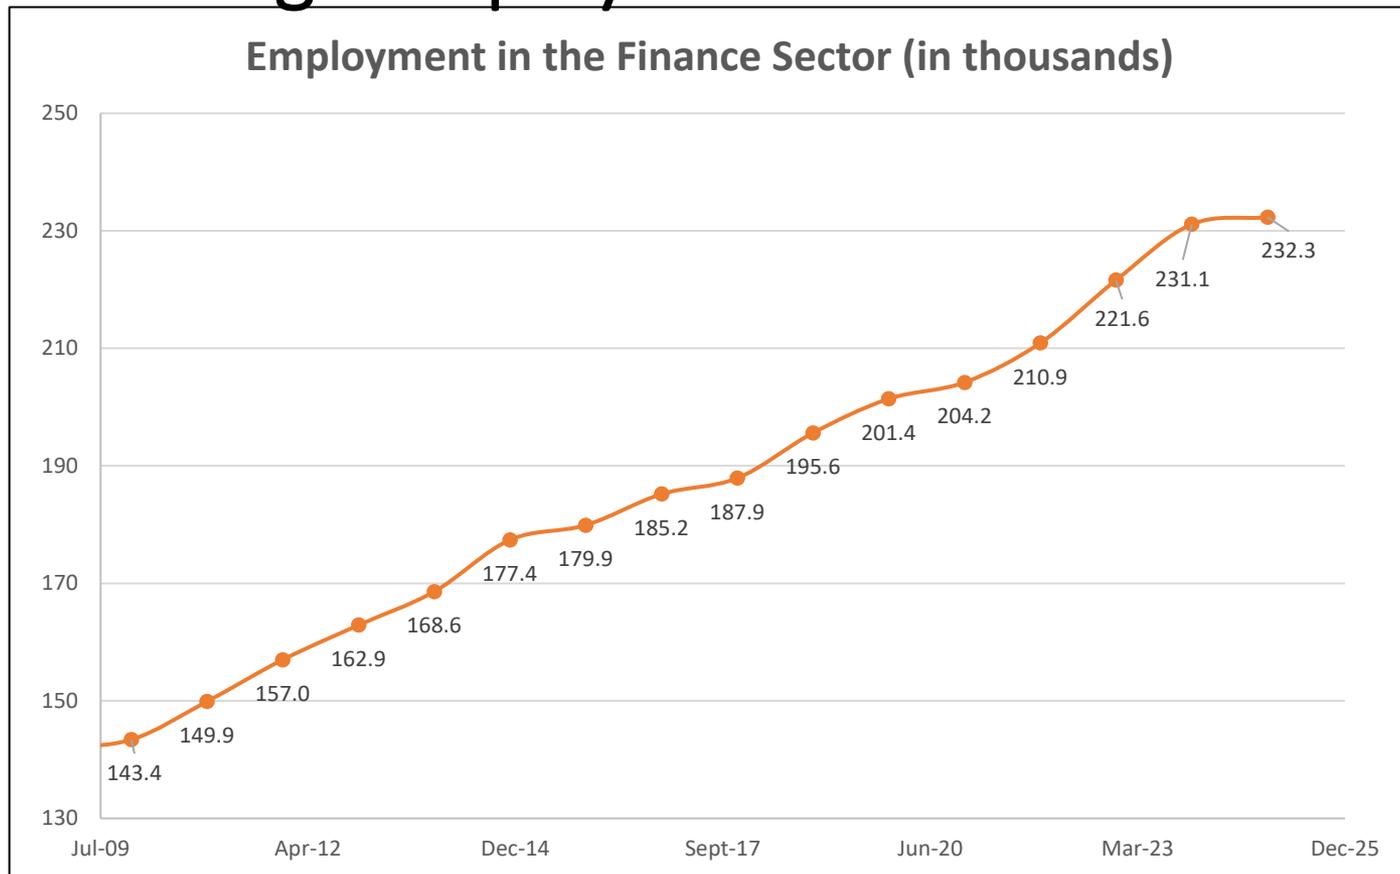

Source: Singstat, Tablebuilder,

<http://www.tablebuilder.singstat.gov.sg/publicfacing/mainMenu.action>

- The only business field that is considered a sector and not just a business function.
- Healthy contribution to SG's GDP.
- Contributions to GDP rose to an outstanding record of 14.7% for the 3 quarters of 2025.

High Employment in Finance

Source: Singstat, Tablebuilder,

<http://www.tablebuilder.singstat.gov.sg/publicfacing/mainMenu.action>

- Above exhibits a persistently strong trend in the employment level.
- Employment numbers remained above 200K in recent years, suggesting the finance sector's resilience to economic shocks over the same period.

Finance

WHY STUDY FINANCE?

The finance sector is one of the key pillars of the Singapore economy, contributing about 14.8% to the national Gross Domestic Product (GDP) in the first half of 2025. Singapore is the region's leading financial hub and a hotspot for global financial organisations that seek to establish an Asian presence. The finance sector also accounts for more than half of the cumulative foreign direct investments (FDI) in Singapore up to 2023. The sector employs about 232,300 residents as of Dec 2024, which is a significant part of Singapore's professional workforce. Going forward, job opportunities in the sector will be expanded by the advances in Financial Technology (FinTech) and Asia's growth. In its latest estimates by MAS in Sep 2022, there will be a creation of up to 20,000 new Finance jobs in Singapore's financial sector in 5 years. According to the Ministry of Manpower, the financial and insurance services industry is the one with the highest median gross monthly income of \$8,736 in 2024, compared to the overall median of \$5,500.
