

Innovation and Entrepreneurship Research Peak- Workshop

12th September 2024

Reddi Kotha, Cheong Wei Yang, Senghoon Kim, Ge Xu

SMU

The focus of the entrepreneurship research peak is to develop interdisciplinary collaboration within the business school areas (and across SMU's schools) that leads to impactful academic research.

In addition, the research peak aims to galvanize faculty for tier II or III grant applications in the research area.

Tier II grant application submitted

- Interdisciplinary Research on Future Skills for Mid-Career Individuals in an Aging Society
- Co-PI and collaborators: Prof. Kim Seonghoon, Prof. LIM Ee-Peng, Dr. Cheong Wei Yang, Prof. Tsai Ming-Hong, Prof. Abolfathi Niloofar, Dr. Ge Xu
- Dr. Cheong Wei Yang provided feedback and assisted with the letter of support from SkillsFuture SG

Intended grant application November

Agenda

- Welcome
- Dr. Ge Xu introduce the release of the LKY Business Plan data to SMU researchers.
- Prof. Ted Tschang share the research project on innovation and entrepreneurship.
- Dr. Cheong Wei Yang, Vice Provost Strategic Research Partnerships, share on potential opportunities with government partners.
- Any other matters & Discussion

Welcome

Hosts and invited speakers for the workshop

- Reddi Kotha, Professor of Strategy & Entrepreneurship, Innovation & Entrepreneurship Research Peak Lead, Associate Editor Academy of Management Journal
- Cheong Wei Yang, Vice Provost (Strategic Research Partnerships)
- Senghoon Kim, Associate Professor of Economics; Deputy Director, Centre for Research on Successful Ageing (ROSA)
- Prof. Ted Tschang, Associate Professor of Strategic Management
- Ge Xu, Innovation & Entrepreneurship Research Fellow

LKY Business Plan Data

Professor Reddi Kotha, School of Business

Dr. Ge Xu, Post Doctoral Fellow Innovation & Entrepreneurship

Lee Kuan Yew Global Business Plan Competition

11TH EDITION
LEE KUAN YEW
GLOBAL BUSINESS PLAN COMPETITION

REIMAGINING A SMART,
SUSTAINABLE & RESILIENT FUTURE
11-15 SEPTEMBER 2023

LKY business plan data structure

Sample: 527 startups with English pitch decks and judge scores

Data analysis example - team member with a doctoral degree

Whether startups with any team member of doctoral degree are more likely to get higher judge score/investments

Independent variable: whether the startup has any team members with a doctoral degree or who are PhD student
Constructed using the variable 'CurrentEduDoctoral' in multiple row datasets '6. Team'

Dependent variable1: total amount of investment given by judges

```
. ttest judge_invest_sum, by(d_team_PhD)
```

Two-sample t test with equal variances

Group	Obs	Mean	Std. err.	Std. dev.	[95% conf. interval]	
0	410	223903.7	12991.73	263062.5	198364.8	249442.6
1	117	371787	32250.3	348840.3	307911.3	435662.8
Combined	527	256735.5	12657.36	290568.6	231870.3	281600.7
diff		-147883.4	29793.66		-206412.8	-89353.92

diff = mean(0) - mean(1) t = **-4.9636**
H0: diff = 0 Degrees of freedom = 525

Ha: diff < 0 Ha: diff != 0 Ha: diff > 0
Pr(T < t) = **0.0000** Pr(|T| > |t|) = **0.0000** Pr(T > t) = **1.0000**

Dependent variable2: whether there is VC investment received, source Pitchbook

```
. ttest d_vc_invest, by(d_team_PhD)
```

Two-sample t test with equal variances

Group	Obs	Mean	Std. err.	Std. dev.	[95% conf. interval]	
0	410	.2682927	.0219084	.4436121	.2252255	.3113599
1	117	.4529915	.0462182	.4999263	.3614505	.5445324
Combined	527	.3092979	.0201531	.4626433	.2697075	.3488883
diff		-.1846988	.0478637		-.2787268	-.0906708

diff = mean(0) - mean(1) t = **-3.8588**
H0: diff = 0 Degrees of freedom = 525

Ha: diff < 0 Ha: diff != 0 Ha: diff > 0
Pr(T < t) = **0.0001** Pr(|T| > |t|) = **0.0001** Pr(T > t) = **0.9999**

Data analysis example - patents

Whether startups mentioning patents in pitch decks are more likely to get higher judge score/investments

Independent variable: whether the startup mentioning the word 'patent' in pitch deck, generating by  LIWC

LIWC calculates the percentage of the word 'patent' among the total words within a pitch deck.

For example, 4.2 means that 4.20 percent of all the words in the pitch deck is 'patent'.

We generate the binary variable 'd_patent' to indicate whether pitch decks mentioned 'patent' based on LIWC calculation.

Dependent variable1: total amount of investment given by judges

```
. ttest judge_invest_sum, by(d_patent)
```

Two-sample t test with equal variances

Group	Obs	Mean	Std. err.	Std. dev.	[95% conf. interval]	
0	433	220938.9	12618.29	262569.6	196138	245739.8
1	94	421628.2	36295.32	351896.2	349552.9	493703.5
Combined	527	256735.5	12657.36	290568.6	231870.3	281600.7
diff		-200689.3	31914.68		-263385.5	-137993.2

diff = mean(0) - mean(1)

t = -6.2883

H0: diff = 0

Degrees of freedom = 525

Ha: diff < 0

Pr(T < t) = 0.0000

Ha: diff != 0

Pr(|T| > |t|) = 0.0000

Ha: diff > 0

Pr(T > t) = 1.0000

Dependent variable2: whether there is VC investment received, source Pitchbook

```
. ttest d_vc_invest, by(d_patent)
```

Two-sample t test with equal variances

Group	Obs	Mean	Std. err.	Std. dev.	[95% conf. interval]	
0	433	.2771363	.0215344	.4481021	.234811	.3194615
1	94	.4574468	.0516595	.5008572	.3548613	.5600323
Combined	527	.3092979	.0201531	.4626433	.2697075	.3488883
diff		-.1803105	.0521026		-.2826657	-.0779554

diff = mean(0) - mean(1)

t = -3.4607

H0: diff = 0

Degrees of freedom = 525

Ha: diff < 0

Pr(T < t) = 0.0003

Ha: diff != 0

Pr(|T| > |t|) = 0.0006

Ha: diff > 0

Pr(T > t) = 0.9997

Data sharing timeline

LKY business plan datasets will be shared within SMU through library end of September.

We will share the datasets and a code book explaining how the variables were constructed. There will be a reference doi for citing.

We will share the link of the LKY business plan data through email.

Research Project on Innovation and Entrepreneurship

Prof. Ted Tschang, Associate Professor of Strategic Management

YAO Xiaoxia (Shine), Doctor Business Administration

Potential Opportunities with Government Partners

Dr. Cheong Wei Yang, Vice Provost Strategic Research Partnerships

Any other Matters?

- Prof. TSAI Ming-Hong (SOSS), research proposal
- Measures of prosocial behaviors using archival data and how they might be related to the Singapore Government's records
- Potential data:
 - Volunteer Work
 - Donation Records
 - Blood Donation

Thank you!
See you next time!
